# How to convert your Project Notebook into html format
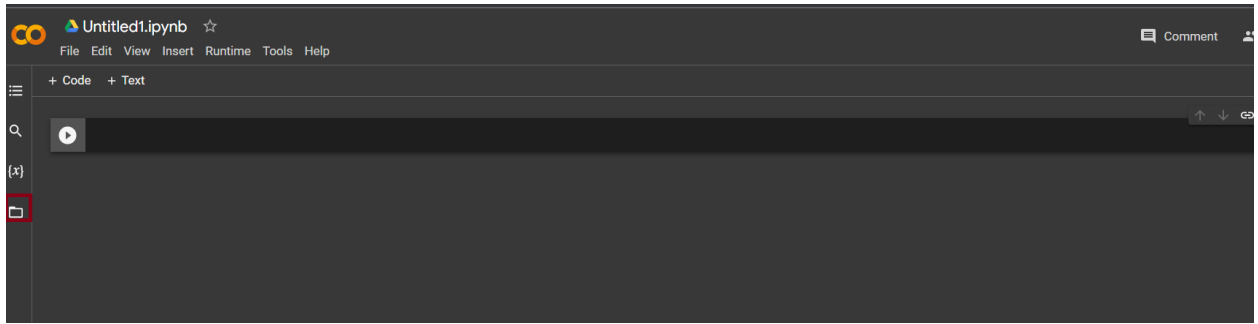

1. Once you have written all the codes on your Project Notebook, run it from top to bottom and then download as .ipynb file

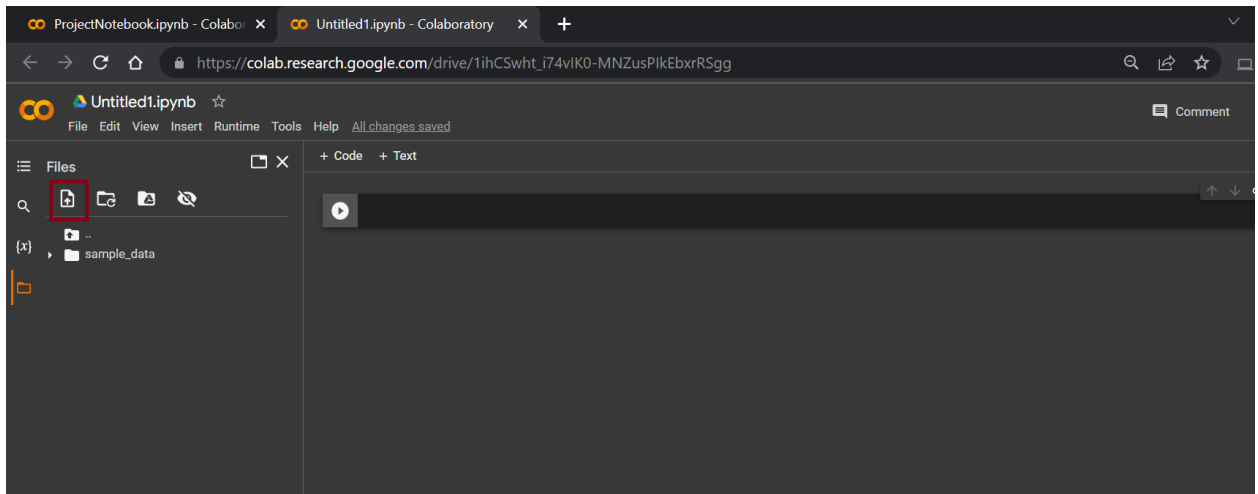

2. Go to https://colab.research.google.com/ and open a new notebook

3. The screen will look like the below image. Click on the **Files icon** on the left

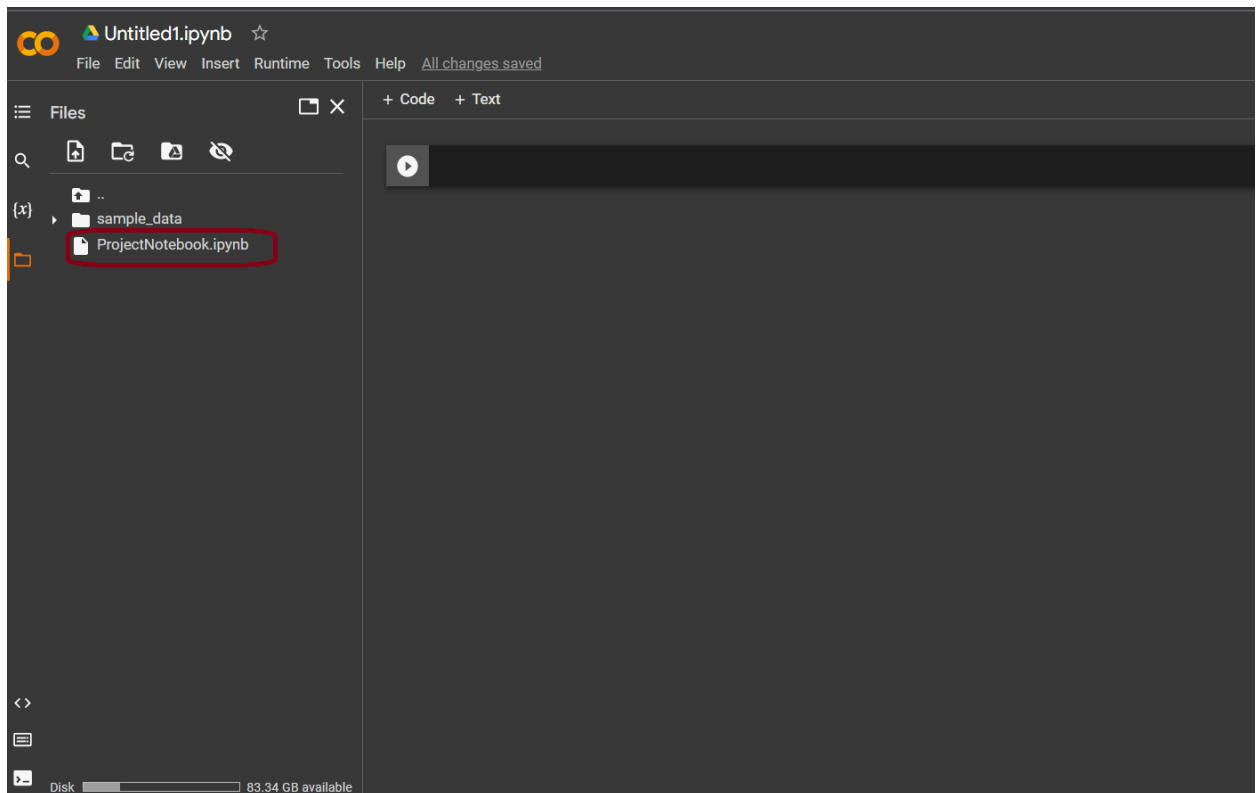

4. Once you click on the **Files icon**, you will be able to see the **upload icon** under **Files.** Browse the downloaded Project notebook and upload it.

5. Once you start uploading, you will be able to see **Files** and in the bottom left as well. It might take a few minutes as per the size of the file.
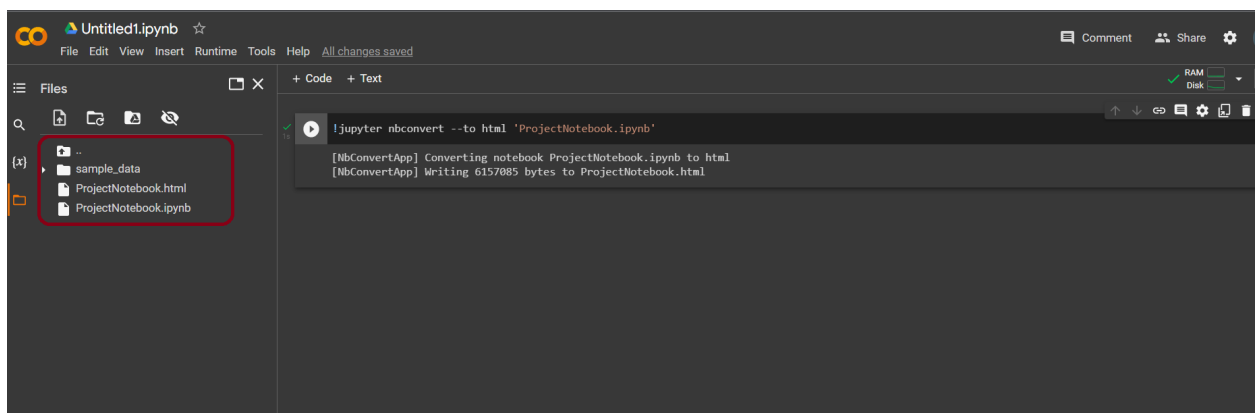

6. This is how it will look once it's uploaded.

7. Now use the following command and run into a Code cell to convert this notebook to html

!jupyter nbconvert --to html 'ProjectNotebook.ipynb'

Please change the name of your project notebook within quotes.
It may take a few minutes to convert this to a .html file. You will be able to see this under Files once this is converted.

8. You can download this html file and check if all the comments, observations, graphs and results are intact.
